

Exercise 01 – Initializing Git

1. Open up the terminal and change to your `home` directory
2. Create a folder called comp2156
3. Initialize the directory with Git using the following command:
 - a. `git init`

```
ghost@Garrys-MacBook-Pro ~/comp3104 git init ✓ 273 21:51:45  
Initialized empty Git repository in /Users/ghost/comp3104/.git/  
ghost@Garrys-MacBook-Pro ~/comp3104 master _ ✓ 274 21:51:53
```

```
owusu@Fenrir MINGW64 ~  
$ mkdir comp2156  
mkdir: cannot create directory 'comp2156': File exists  
  
owusu@Fenrir MINGW64 ~  
$ cd comp2156  
  
owusu@Fenrir MINGW64 ~/comp2156 (master)  
$ git init  
Reinitialized existing Git repository in C:/Users/owusu/comp2156/.git/  
  
owusu@Fenrir MINGW64 ~/comp2156 (master)  
$ |
```
